

Hi Louis-Philippe

Thank you for making *Six Mil Antennas* available for the fulldome showcase screening at the Melbourne International Film Festival (MIFF). The screenings were very successful, and had completely sold out even before the Opening Night of MIFF. The audience were thoroughly entranced by *Six Mil Antennas*. Many of the audience found the film challenging, but all were completely overwhelmed by the stunning imagery. I believe *Six Mil Antennas* to be a landmark film in fulldome cinema, that will change the way the medium is looked at forever.

There must have been considerable word of mouth after the first showcases, as the following week there were dozens of people hoping to pick up a 'standby ticket'. While a lucky few people did manage to get one, lots of people still had to be turned away. This is definitely a great indication that we need to do more screenings.

Thanks again for supporting the festival, and good luck with *Six Mil Antennas* it is a wonderful film and I hope it attains all of the success that it deserves.

Best regards

Warik
